I Now Pronounce You Chuck & Larry Two comedy dynamos unite in this comedy from director Dennis Dugan (Parenthood, Happy Gilmore). Brooklyn firefighters Larry Valentine (Kevin James) and Chuck Levine (Adam Sandler) have watched each other's back since they met in the Academy even though they are different as can be. Playboy Chuck can't get enough of the ladies—and they can't get enough of him. Larry, meanwhile, is a widower raising two young children and still grieving the death of his wife. When Larry saves Chuck's life on a call, he comes up with a unique way for his buddy to repay him: having missed the opportunity to name his children beneficiaries, he asks Chuck to act as his domestic partner so that his children will be provided for if tragedy strikes. But these two buddies soon find themselves the subject of an investigation by the city. Enter Alex McDonough, their highly attractive attorney who leaves Chuck desperately wishing he wasn't pretending to be gay. Initially, Chuck and Larry are as guilty of making stereotypical gay jokes as the next average Joe. In fact, pretty much any and every gay joke and stereotype turns up in this film. But their attitudes change when the shoe is on the other foot and they find themselves and their new gay friends the subject of discrimination, mocking and name-calling. Ving Rhames, Steve Buscemi, Richard Chamberlain, and Nicholas Turturro have supporting roles, and musicians Lance Bass and Dave Matthews make brief appearances. "Saturday Night Live" alumni also abound: watch for Rachel Dratch, David Spade, and Rob Schneider in small roles, while Dan Akroyd plays the boys' captain. *Universal*

Amazing Journey: The Story of The Who For more than 40 years, British rockers The Who have created music for countless fans, influenced artists and shaped the recording industry. Now, the history of the legendary band is captured in an epic documentary. Viewers witness the group's rise to worldwide stardom from its origins as a 1960s cover band. This epic two-volume set matches the grand sounds created by one of rock's most influential bands. *Amazing Journey: The Story of The Who* chronicles the group's reign in music history with two full-length feature documentaries. Pennebaker (*Don't Look Back*) about the band's 2003 return to the studios. License To Wed An all-star cast inhabits this romantic comedy about a couple who must endure a humiliating obstacle course of a marriage-training program in order to gain permission to wed from their church's over-the-top reverend (Robin Williams). Hilarity follows as the lovebirds (Mandy Moore and The Office's John Krasinski) put their devotion to the test. From the moment they met in a Starbucks line, the couple was prone to cute mishaps and clumsiness, but they also displayed amazing chemistry. Then Reverend Frank and his creepy child assistant intervene, putting Sadie and Ben through a torturous process which involves couples counseling, bedroom surveillance, and a very funny sequence in which the couple must take care of two robotic fake babies while shopping for their registry at Macy's. While Krasinski's average-guy expressions are fun to watch, his persona on the big screen isn't too much of a stretch from his role in the television sitcom. And Moore's typical likeability becomes irritatingly upbeat in several scenes. Packed with Office cameos, *License To Wed* promises laughs up until the end, where it veers towards the trappings of an archetypal romantic comedy. *Warner*

The Princess Bride Director Rob Reiner breathes vividly colored cinematic life into William Goldman's *The Princess Bride*, effectively evoking the wondrous, wide-eyed spirit of the witty 1973 novel. When a sick boy (Fred Savage) receives a visit from his dotting grandfather (Peter Falk) who intends to read to him from his favorite book, he's not exactly pleased to be extracted from his world of video games. However, his mood quickly changes as he, along with the viewer, is transported to a place out of time—to Florin, a kingdom in the ultimate imaginary land, complete with dashing heroes, cowardly princes, rhyming giants, shrieking eels, rodents of unusual size, fancy swordfights, and yes...even some kissing. The lovely Buttercup (Robin Wright) learns that "As you wish" really means "I love you" when she falls for her charming farmhand, Westley (Cary Elwes). While trying to seek his fortune, however, Westley disappears at sea, an apparent victim of the Dread Pirate Roberts, who takes no prisoners. A few years later, Buttercup, engaged to the oily Prince Humperdinck (Chris Sarandon), is kidnapped by an oddball trio of rogues—brains, Vizzini (Wallace Shawn); brawn, Fezzik (André the Giant); and sword, Inigo Montoya (Mandy Patinkin in a standout performance). As they sail away toward the Cliffs of Insanity, they notice the pursuit of a man in black...and the adventure begins. A clever fairy tale for all ages, *The Princess Bride* is arguably one of the funniest and most *entertaining films of all time*. *Fox*

Deck the Halls A slapstick holiday heart-warmer in the tradition of *Home Alone*, *Deck The Halls* boasts an excellent cast that includes both seasoned actors and promising stars. Matthew Broderick (Ferris Bueller's Day Off) stars as Steve Finch, an optometrist in the postcard town of Cloverdale, Massachusetts, who does double duty as the town's "Christmas Guy." Steve was raised as an army brat, and as an adult looks to make up for his childhood's lack of Yuletide cheer, organizing Christmas around a strict regimen of maximum celebration efficiency. Because Steve finds his kids turning out a little weirder than he would like--10-year-old Carter (Dylan Blue) is suffering a midlife crisis and teenage Madison is a loner with a bad attitude--he deems them in need of heightened holiday cheer. Steve's hopes for the perfect Christmas are disturbed, however, when new neighbors move in across the street. Car salesman Buddy Hall (Danny DeVito), his wife Tia, and their blonde-bombshell twin daughters (Sabrina and Kelly Aldridge) are a bit rowdier than most of the folks in the Finches' quiet neighborhood, to say the least. When Buddy takes it upon himself to create an extravagant Christmas spectacle so that his house can be seen from space, the rivalry between Steve and Buddy reaches drastic heights of ridiculousness, until both men learn a little something about the meaning of Christmas. Although Cloverdale resembles few contemporary American towns in its community made up exclusively of well-to-do Christians, *Deck The Halls* offers much for families to enjoy, with a warm message about the importance of family and the value of spontaneity in a culture of efficiency. Kristen Davis of *Sex And The City* charms as Steve's wife Kelly, while Broderick and DeVito are always fun to watch. *Fox*
